

Change Log:

Updated iOS Ntdr SDK v183 Hotfix contains changes which should be considered by host app before integration and testing.

- Upgraded Facetec SDK to version 9.7.79.
- Fixed an iOS 26 Beta Compatibility Issue.
- Improved error logging. Added a new Error Code "STATUS_SESSION_EXPIRED" to check liveness session expired or not.
- Fixed an issue related to uploading remote biodata using SELFIE_IMAGE acquisition object.

Certificates:

- When you include new Ntdr SDK v1.8.3, please verify if new readid_certificates.plist file is added.
